

# OFFERING TURN-KEY SOLUTIONS SINCE 1987

MSD Engineering and Mining Supplies (MSD) was established in 1987. We have been in the pumping and mining industry for over 30 years.

We have been agents for Gorman-Rupp Africa, previously known as Pumptron since 1988, enabling us to supply Gorman-Rupp pumps and spares, in and around Western Gauteng. We have since grown from just supplying Gorman-Rupp pumps to offering a wider range of large industrial pumping solutions. Amongst our clients are various municipalities and all the local mining houses.

We continually strive to be a strong and dedicated company and are committed to providing high-quality products and services to our customers. Moreover, our efforts extend beyond providing outstanding products and services to those who need them. MSD is implementing a strategy to accelerate growth through innovation and strengthening our organizational and associates' capabilities. MSD is driven to constantly develop and evolve our sector of the industry and to contribute to our local area.

Our service and product offering includes the following:

- Gorman-Rupp self-priming centrifugal pumps (supply, repair and maintenance)
- Design of pumping systems and plants
- Pipe (HDPE, PVC & galvanised steel) and pipe fittings (compression & thermoplastic)
- Valves: High Pressure, Slurry, Wedge, Non-Return and Butterfly Valves
- High pressure washers and vacuum cleaners
- Air filtration systems
- Snap-On tools
- All other mining supplies and pump related accessories
